A Short Introduction to Logic xxii

What exactly is *logic?*
What are the parts or branches of logic?
How should Christians view logic?
Why should we study logic?
What parts of logic are commonly covered in textbooks?
A short, annotated bibliography for teachers of logic

Part I: Introduction to Logic

Chapter 1 **Thinking and Reasoning** 1

Thinking and reasoning
Does reasoning work?
Reasoning in the Bible

Chapter 2 **Logic: A Science and a Toolbox** 7

A science
Why study logic?
A toolbox
Raw materials for logic's tools to work on

Chapter 3 **Language** 12

Referring to things using words
Referring and describing
Thinking things about things
Four kinds of sentences
Statements

PDF version copyright Norman M. Birkett 2005

Part II: Statements and Truth Values

Chapter 4 **Statements and Truth** 19
The importance of being true
Truth values
Ways to determine what's true

Chapter 5 **How to Be Contrary** 23
Pairs of statements
Contradiction
Contrariety
Subcontrariety, or contrariety in reverse
All together now

Chapter 6 **Negation** 27
Logical operators
The negation operator ('not')
Your negation's not your opposite
Other tricky cases

Part III: Logical Operators

Chapter 7 **Atoms and Molecules** 31
Atomic statements
Molecular statements
The negation operator
Picturing molecules: Parsnip trees

Chapter 8 **The Conjunction and Disjunction Operators** 37
Conjunction ('and')
Disjunction ('or')
Exclusive disjunction
Identifying logical operators in statements

Chapter 9 **Combining Operators** 42
Recursion
Identifying operands
Handling three or more conjuncts or disjuncts
Exclusive disjunction again

Chapter 10 **Evaluating Molecular Statements** 48
Evaluating statements
Logical operators and truth values
Evaluating complicated molecular statements

PDF version copyright Norman M. Birkett 2005

Chapter 11 **The Equivalence Operator** 53
Something negation, conjunction, and disjunction have in common
Equivalence, or the biconditional ('if and only if')
Parsnip trees for equivalence
Determining the truth value of an equivalence

Chapter 12 **The Implication Operator** 62
Absolute and relative operators, again
Implication, or the conditional ('if ... then ... ')
Parsnip trees for implication
Determining the truth value of an implication
'Unless'
Why equivalence is also called the biconditional

Chapter 13 **Atoms, Molecules, and Big Molecules** 71
Atomic and molecular statements redefined
Logical operators contained within a single independent clause
Putting all the logical operators together: The 'logic' of tax instructions

Part IV: The Moleculan Language[1]

Chapter 14 **The Moleculan Language** 86
The Moleculan language: A tool for working with molecular statements
Reading Moleculan sentences aloud
Diagramming Moleculan sentences with Parsnip trees
Describing the structures of Moleculan sentences in English

Chapter 15 **Moleculan Grammar** 92
Grammar rules for Moleculan
Phrase-structure grammar of Moleculan
A shortcut for spotting some expressions that aren't sentences
Telling why an expression isn't a grammatical sentence

Chapter 16 **Truth and Meaning in Moleculan** 96
All Moleculan sentences are meaningless
Interpretations
Valuations
How to do English-to-Moleculan translations

Chapter 17 **Truth Tables and the Five Logical Operators** 99
Truth tables
Review of the five logical operators
Metamoleculan
The 'official' truth tables for the five logical operators

[1] Those who browse these Contents may want to know that 'Moleculan' is the system commonly called the sentential calculus, or the propositional calculus, or propositional logic, or any number of other unwieldy names.

PDF version copyright Norman M. Birkett 2005

Chapter 18 **Evaluating Moleculan Sentences** 103
Two kinds of truth tables
Evaluating Moleculan sentences

Chapter 19 **Sentences That Are Always True (or False)** 105
Building multiple-valuation truth tables
Tautologies
Antilogies

Chapter 20 **Metamoleculan and Moleculan Tautologies** 108
Metamoleculan, truth tables, and tautologies
Translating Metamoleculan tautologies into Moleculan
Translating Moleculan tautologies into Metamoleculan
Other tautologies

Part V: The Logic of Moleculan Arguments

Chapter 21 **Arguments: The Good, the Bad, and the Ugly** 111
Arguments in logic
Recognizing arguments and their parts
What arguments are used for
Good and bad arguments

Chapter 22 **Recognizing and Standardizing Arguments** 115
Recognizing arguments
Standardizing arguments
Enthymemes

Chapter 23 **Moleculan Arguments** 120
Translating arguments into Moleculan
How to tell whether a Moleculan argument is Moleculan-analyzable
Metamoleculan arguments, or argument forms

Chapter 24 **Testing Moleculan Arguments for Validity** 130
Validity
Producing the argument-sentence for an argument
Testing the argument for validity, using the argument-sentence
Determining whether a Moleculan argument is sound
Testing argument forms for validity

PDF version copyright Norman M. Birkett 2005

Chapter 25 **Arguments That Have Names** 136
Two very common arguments: Modus Ponens *and* Modus Tollens
Two single-premise arguments: the Simplification Argument and the Addition Argument
The Conjunctive and Disjunctive Syllogisms
Two arguments involving implication: the Transitivity Argument and the Transposition Argument
Two fallacies: Affirming the Consequent and Denying the Antecedent
A concluding word

Chapter 26 **More Arguments** 146
A short review
A very *simple argument*
Two arguments with implications as their conclusions
Three arguments with implications as their premises
A strange argument
More named arguments: The Dilemmas
Ideas for additional exercises

Part VI: Other Arguments

Chapter 27 **Three Kinds of Arguments** 153
Arguments in general
Deductive arguments
Inductive arguments
Conductive arguments
Distinguishing the three kinds of arguments

Chapter 28 **The Appeal to Authority** 158
Two ways in which inductive arguments differ from deductive arguments
Two kinds of authority
The appeal to authority
Assessing the cogency of the appeal to authority

Chapter 29 **Identifying the Appeal to Authority** 165
The appeal to force
The testimonial
The attributed argument
Examples

Chapter 30 **The Argument from Analogy** 170
Analogies in general
The argument from analogy
Assessing the cogency of analogical arguments

PDF version copyright Norman M. Birkett 2005

Chapter 31 **The Inductive Generalization** 177
The need for inductive generalizations
Definition of the inductive generalization
Assessing the cogency of an inductive generalization

Part VII: Questions

Chapter 32 **Questions and Real Questions** 185
Questions
When is a question not a question?
When is a non-question a question?

Chapter 33 **Questions and Their Answers** 188
Classifying questions by their kinds of answers
Questions of fact versus other kinds of questions
Unanswerable questions

Appendix **Song: The Twelve Days of Logic** A-1

PDF version copyright Norman M. Birkett 2005
